

JETPRO ELECTRIC HYDRAULIC PUMP

The compact design and simple controls of HYTORC's electric hydraulic power units speed up work with quiet, air-cooled operation. Automatic models further simplify working with pumps.

Our electric hydraulic power units are productive, lightweight, economical, high-quality, and reliable.

ALL MODELS INCLUDE:

- Precise pressure regulator (70–700 bar)
- Calibrated 1.0-class pressure gauge
- Automatic power shut-off
- Oil cooler (except for the Minijet model)
- Remote control with a 5 m cable (24 V)

MINIJET

Lightweight 2-stage hydraulic pump, ideal for maintenance and field use due to its portability. Weight: 14 kg.

JETPRO 5.3

Lightweight 3-phase hydraulic pump, ideal for maintenance and field use due to its portability. Weight: 15 kg.

JETPRO 6.3

Lightweight 400V hydraulic unit designed for maintenance and field applications. Also available as a semi-automatic model. Weight: 15 kg.

JETPRO 9.3

Compact electric hydraulic unit, available with a four-port manifold for simultaneous use of multiple wrenches. Equipped with extensive automation and documentation features. Weight: 25 kg.

JETPRO 12.3

High-performance hydraulic unit, available with a four-port manifold for simultaneous use of multiple wrenches. Equipped with extensive automation and documentation features. Weight: 26 kg.

JETPRO 18.3

High-performance hydraulic unit designed for simultaneous operation of multiple wrenches. Equipped with extensive automation and documentation features. Weight: 29 kg.
