

LIGHTNING BATTERY-POWERED HYDRAULIC PUMP

The LIGHTNING pump is the fastest single-motor pump on the market designed for hydraulic wrenches. Its design focuses on speed, reliability, and versatility. Being battery-powered, the pump offers new possibilities for hydraulic torque wrench use, making work safer by eliminating excess cables on the ground. The Smart pump with automatic function eliminates the need to manually select torque or pressure—just press a button, and the pump takes care of the rest. The Smart pump's backup battery ensures that torque data is not lost when switching batteries.

- Battery-powered
- Brushless DC motor
- Durable and rainproof
- Transport/protective case (available as an accessory for the Standard pump)
- Torque & Angle feature available on Smart model (only 1-tool version)

Model	Battery Wh	Power kW	Gauge	Data recording	Remote control	Oil cooler	Ports	Oil capacity L	Weight kg*	Flow l/min				Dimensions mm		
										100 bar	270 bar	425 bar	700 bar	A	B	C
Standard	1170	1,5	Analog		✓	✓	1 or 4	2,7	32	2,35	2,1	1,5	1,0	535	273	510
Smart	1170	1,5	Digital	✓	✓	✓	1 or 4	2,7	35	2,35	2,1	1,5	1,0	535	273	510

*) Without battery and oil
