

TEKKOR

IMPULSE GUN

Tekkor's cordless impulse wrenches combine the precision of a torque wrench and the benefits of an impact tool into one ergonomically designed package. Thanks to the advantages of a cordless impulse wrench, it is an excellent alternative for many applications. The hydraulic impulse makes the tool quiet and vibration-free, a joy for every operator to use.

- Torque can be adjusted according to the application and joint type to achieve the best possible result.
- Torque can be locked to a desired value, eliminating accidental torque changes.
- Minimal effect of oil temperature on torque accuracy.
- Reversing switch that can be programmed to a tightening position.
- Trigger can be programmed with a delay to avoid double activations.
- Audible and visual indication of successful tightening (OK/NOK).
- Powerful and advanced brushless electric motor.
- Automatic shut-off adjustment according to joint type: 1-10 hard, 11-20 medium and 20-30 soft.

SHUT-OFF POINT

LED LIGHTS

- REVERSE
- OK
- NOK
- LOW BATTERY WARNING
- CHANGE BATTERY
