

PRO-TEST 3 -TORQUE TESTER

The Pro-Test 3 is an updated version of the Pro-Test, the world's most popular torque wrench calibration device. The Pro-Test 3 has undergone a comprehensive update, and user feedback has been taken into account. The device's display and sensor are connected via a 1" RAM mount, allowing for a setup tailored to the application. User profiles, preset workflows, and internal storage make this advanced calibrator an excellent choice for applications where data and accuracy matter.

- | The Pro-Test 3 meter has an accuracy of better than $\pm 0.5\%$ in the 20–100% measurement range and better than $\pm 1\%$ of the reading in the range below 20%
- | Three different operating modes: Track, Dial, and Click
- | Color LCD display, plus physical buttons
- | 1" RAM mount on the display and sensor
- | Internal storage for 2,000 results
- | Ability to create user profiles
- | 150 presets, enabling precise and repeatable workflows
- | Includes easy-to-use TestSync software for reading, downloading, and uploading data

Model	Item	Calibrated torque range Nm	Hex size mm	SQ Adapter
