

HYTORC MXT+ HYDRAULIC TORQUE TOOLS

HYTORC MXT+ is the world's first torque wrench to offer a unique hybrid solution, allowing the reaction arm to be positioned either at the rear of the body or on the drive shaft, depending on the requirements of the workpiece.

- | A strong and durable frame construction
- | Includes both side axial and rear reaction arms
- | A comprehensive range of reaction arms for both coaxial drive and rear reaction
- | Integrated tool counter for extended tool life
- | Built-in, pump-controlled auto-release mechanism
- | 360° x 180° uni-swivel for easy setup of tool and hoses in even tight places
- | Equipped with an easy-to-install cover to prevent damage to the tool's rear splines
- | Fully compatible with HYTORC Washers, True-Lock Washers and NUT

Item	Drive	Torque Range Nm	R mm	L mm	H mm	W mm	Weight kg
MXTP-01	3/4"	278 - 1 843	30	131	162	55	3
MXTP-03	1"	629 - 4 226	38	169	206	74	6
MXTP-05	1 1/2"	1 101 - 7 351	47	204	235	86	8
MXTP-10	1 1/2"	2 482 - 16 471	60	255	297	110	11

AUTO-RELEASE

The MXTP+ Wrench has an integrated auto release feature so the operator doesn't have to flip a lever to un-lock the tool from the application. Simply advance the pump and the tool will free itself making bolting operations faster, safer, and simpler.

EMBEDDED CYCLE-COUNTER

The MXTP+ has an embedded cycle counter to monitor tool use and schedule preventative maintenance and calibration. This feature helps maintain the tool at peak performance for accurate and repeatable bolting results. By providing preventative maintenance the user can achieve the longest tool life possible.

DUAL REACTION

The MXTP+ dual-reaction feature allows the user to configure the wrench for rear reaction arms compatible with the original MXTP or newer reaction arms compatible with AVANTI and ICE product lines.

Number	Description	Compatibility
1	Square drive type reaction arm	MXT+ / ICE / AVANTI
2	360° x 360° rotatable reaction arm	MXT+ / ICE / AVANTI
3	Standard reaction arm	MXT+ / MXT / EDGE-S
4	Reaction sleeve	MXT+ / MXT / EDGE-S
5	Track pad fixture	MXT+ / ICE / AVANTI
6	Washer driver socket	MXT+ / ICE / AVANTI
7	HYTORC Nut driver	MXT+ / ICE / AVANTI
8	Alco arm	MXT+ / MXT / EDGE-S
9	U-shaped reaction arm	MXT+ / ICE / AVANTI
10	Reaction pad	STEALTH / VERSA / XLCT
11	Alco arm	STEALTH / VERSA / XLCT
12	Welding adapter	MXT+ / ICE / AVANTI

DUAL HYDRAULIC HOSES

- Hose working pressure: 700 bar
- High-visibility color ensures visibility even in poor conditions
- Hose lengths can be customized according to customer specifications, starting from 0.5 m
- All hoses, wrenches, and pumps can be equipped with connectors according to customer requirements
- Standard lengths (m): 5, 6, 8, 10, 12, 16
- Available with protective casing
